

Project #10

GATHER RESOURCES FOR PERSONAL PREPARATION FOR WORSHIP LEADERSHIP

OBJECTIVE: To apply the principles of personal spiritual and practical preparation to a previously designed worship service, ensuring the leader is equipped to lead with freedom and worship genuinely while guiding the congregation.

Read pages 211-215 in *The Worship Ministry Guidebook*.

Background: The book emphasizes that for worship leaders, personal preparation is a “vital piece” that can “make a powerful impact on your leadership.” When leaders are well-prepared, they experience “greater freedom in their worship and a greater ability to worship while leading.” The book guides you through the spiritual and practical steps necessary for effective personal preparation.

Based on the material in the book for preparing personally for worship, prepare everything you need for leading worship for the service you created in an earlier project. *You should wait to prepare any resources you need for any speaking you may do until the next project.*

Report verbally showing all the resources you have produced and describing how the resources will help you in worship leadership. Also, discuss the spiritual preparation you would undertake leading up to the service and how it will aid in your leadership.
